The LiDAR point cloud, block Hingston to Hampton, seen obliquely from the south

City of Montréal airborne LiDAR 2015, night; 173,497 returns, each coloured by its height above ground or, for vegetation, by the City’s classification. The red boxes at the curbs and in the driveways are parked cars; the dotted lines bound the driving lanes.

ground, pavement, lawns (< 0.3 m)
low objects: fences, hedges, steps (0.3–0.9 m)
car height (0.9–2.3 m): parked cars
garages, sheds, vans, porches (2.3–3.6 m)
houses (> 3.6 m)
trees and shrubs (City classification, class 5)
Side where the lane would become parking each winter (the proposal, as the councillor described it)
